

Models from Data and Human Computation

EE382V Activity Sensing and Recognition

UT Austin • Dept. Electrical and Computer Engineering • Fall 2016

Today + Admin

Final Exam: Thursday, December 8, 7:00-10:00 pm

Talk more about the exam on November 17th

Building activity recognition systems leveraging existing data

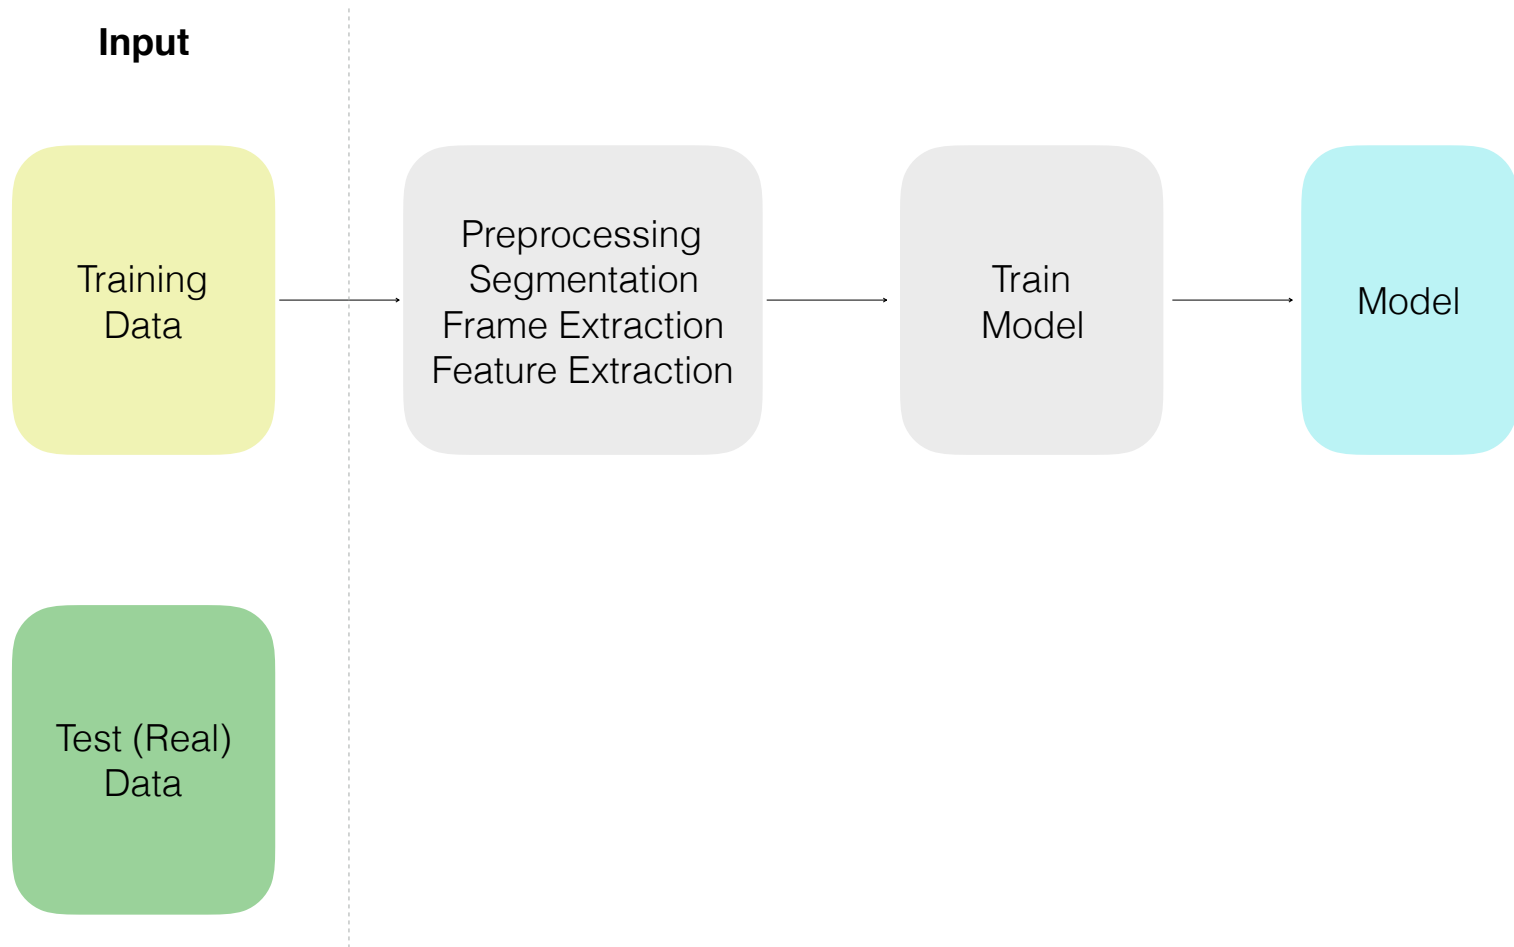

Outsource the ML machinery

Legion:AR

Mining common sense from the web

Recognition of human activities with human computation

Why Explore Other Methods?

Human Computation

“Integrating people into computational processes to solve problems too difficult for computers”

Luis von Ahn
Associate Professor
CMU

Labeling Images with a Computer Game

“If the game is played as much as popular online games, we estimate that most images on the Web can be labeled in a few months.”

Player 1 guesses: purse
Player 1 guesses: bag
Player 1 guesses: brown

Success! Agreement on “purse”

Player 2 guesses: handbag

Player 2 guesses: purse
Success! Agreement on “purse”

Labeling Images with a Computer Game

Figure 2. The ESP Game. Players try to “agree” on as many images as they can in 2.5 minutes. The thermometer at the bottom measures how many images partners have agreed on.

“Rather than using computer vision techniques, which don’t work well enough, we encourage people to do the work by taking advantage of their desire to be entertained.”

Recaptcha

Human Computation?

Amazon Mechanical Turk

Make Money by working on HITs

HITs - *Human Intelligence Tasks* - are individual tasks that you work on. [Find HITs now.](#)

As a Mechanical Turk Worker you:

- Can work from home
- Choose your own work hours
- Get paid for doing good work

Get Results from Mechanical Turk Workers

Ask workers to complete HITs - *Human Intelligence Tasks* - and get results using Mechanical Turk. [Register Now](#)

As a Mechanical Turk Requester you:

- Have access to a global, on-demand, 24 x 7 workforce
- Get thousands of HITs completed in minutes
- Pay only when you're satisfied with the results

How does it work? Have you tried it?

Is it possible to identify eating moments from FPPoV images?

← not food recognition!

Thousands of images per day (one every 30 seconds)

How to review all the images?

Human Computation (Amazon Mechanical Turk)

2

User Study

Participants

5 participants, 3 days

**iPhone 3GS as camera
held with lanyard**

Custom application

Photo every 30s

17,575 images total

IRB & Privacy Concerns

1

Concerns regarding participants & secondary participants
Images released to AMT workers

2

Image removed if any recognizable body part
Two phase review process
Participant review
Researchers review

All images in one HIT

Subpar recognition

\$0.1 or Cheaper

Image Groups

~120 Images per Group

12PM

Guidelines for HIT

3 Questions

Questions

12PM

1. Do any of the photos show this person eating food?

Yes or No

2. If yes, can you tell where this person is when eating?

Guidelines for HIT

Home, Work, School, Fast-food, Sit-down, Car, Other

3 Questions

3. If yes, is the person having a snack or a meal?

Meal or Snack

Guess eating behavior based on photos

Please visit this [page](#) (opens in new window), review the photos and answer the questions below.

The photos were taken by one person throughout the day. You can move the mouse over the images to see them in more detail.

Please note:

- A snack tends to be a small, quick meal such as a chocolate bar, a yogurt, a piece of fruit or a cookie.
- A meal is typically a longer eating event (eg. breakfast, lunch and dinner), involving the consumption of more food than a snack.
- If you see the person cooking food, it doesn't necessarily mean that the person is eating food.
- If you see the person shopping for food, it doesn't necessarily mean that the person is eating food.
- Drinking does not count as an eating activity.
- Out of many images, only one or two might suggest an eating behavior. So please, pay attention!
- Do your best, use your judgement. We realize this is not an easy task.

1. Do any of the photos show this person eating food?

☐ Yes ☐ No

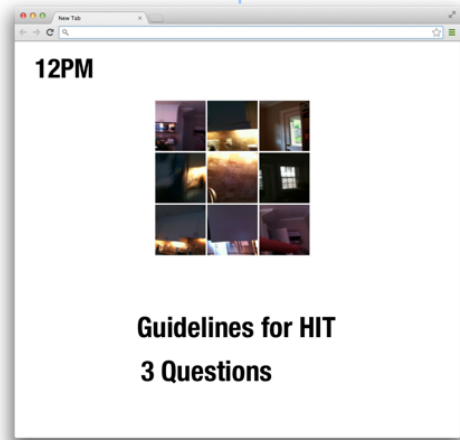

2. If yes, can you tell where this person is when eating?

Pick location ▾

3. If yes, is this person having a snack or a meal?

Master Workers

Advanced

For the best quality, Master Workers are currently selected to complete your work. [\(What is a Master Worker?\)](#) [Worker requirements »](#)

Only Workers who qualify to do my HITs can preview my HITs.

☐ Yes ☒ No

What is a Master Worker?

Workers who have demonstrated excellence in a type of HIT, for instance categorization, are awarded the Master Qualification. By selecting this Qualification Type, you are requiring that your work be completed by a Worker with this Qualification. *Because Masters have demonstrated accuracy, they can command a higher reward for their HITs. You should expect to pay Masters a higher reward.*

Participant	Worker Type	TP	FP	TN	FN	Precision	Recall	Accuracy
P1	regular	5	0	33	9	100%	35.71%	80.85%
	master	10	0	33	4	100%	71.42%	91.48%
P2	regular	1	2	59	10	33.34%	9.09%	83.34%
	master	6	1	60	5	85.71%	54.54%	91.67%
