Xeon-Phi

It seems there is no DDIO

RAPL: Performance Counters

Decomposition:
          Locality
          Synchronization ⟩ granularity   coarser granularity perhaps better.

Load Balancing:

      system noise : Because of OS, power control
      IBM, CRAY → did not run Linux to reduce system noise,
            → Built their own OS kernels

Work Stealing: Run-time systems,

DVFS points on Xeon-Phi ?∧
